

LGBT Caregiver Support Group

caring for someone with memory loss?

LGBT Caregiver Support Groups

provide a consistent and caring place for caregivers to learn, share and gain emotional support from others who are also on a unique journey of providing care to a person with memory loss.

Meetings are free and open to all LGBT care partners, family members and friends of individuals with memory loss.

Support groups are led by Chapter trained volunteers who receive ongoing guidance and materials to enhance communication skills and knowledge of resources.

**2nd Tuesday of each month
6:30 - 8:00 pm**
